Dear Friends and Fellow Cattlemen:

On behalf of the OSU Department of Animal and Food Sciences and the Purebred Beef Center crew, I welcome you to the 2023 Cowboy Classic. The past year has seen several changes in our department and purebred cattle operation. Attending the Cowboy Classic this year will permit you the opportunity to meet new people in key roles. Dr. Richard Coffey joined us last summer as our new Department Chair. Derek Strawn has transitioned from a student employee to the Manager of the Purebred Range. Finally, Grant Hubbard was hired last August to serve as the Headquarters Manager. I have enjoyed working with each of them in their new roles. Each of these men brings a high level of energy, enthusiasm and competence! Each has contributed innovative ideas that have and will continue to take our purebred beef operation and department to a new level. I encourage you to seek them out and meet them sale day.

The constant you will find again at the Cowboy Classic this year is an impressive set of cattle. A strong set of fertility tested breeding age bulls that sell backed by our breeding soundness guarantee, and a great set of females representing the freshest genetics and most popular AI sires in their respective breeds.

The future is bright for those of us in the beef industry prepared to seize the opportunities that have and will continue to result from drought and low cow inventories. If you are looking for new genetics to take your beef operation to the next level, I encourage you to capitalize on the genetic opportunities available Sunday, April 2nd. If you are new to our program or a past customer, I believe you will be impressed with this sale offering!

I look forward to seeing you on sale day.

Mark Z. Johnson

Cowboy Classic Sale Information

INVITED GUESTS AND REPRESENTATIVES

Dr. Richard Coffey Head of Department of Animal Science,
Oklahoma State University
Dr. Don Wagner Emeritus Head of Department of Animal Science,
Oklahoma State University
Dr. Barry Pollard Vice President, American Angus Assn.
Roger Wann Director, American Angus Assn.
Jarold Callahan Executive Director, Oklahoma Angus Assn.
Jim Strate President, Oklahoma Angus Assn.
Rindy Bacon President, Oklahoma Hereford Assn.
Jeff White President, Oklahoma Simmental/Simbrah Assn.
Byron Yeoman President, Oklahoma Cattlemen's Assn.
Michael Kelsey Executive Vice President, Oklahoma Cattlemen's Assn.

SALE STAFF

Matt Sims Auctioneer (405) 641-6081
Jeff Mafi Angus Journal (816) 344-4266
Doug Paul The Stock Exchange (405) 840-3915; c 820-3982

Juston Stelzer SS Auction Services (817) 992-7059

ABSENTEE BIDS

If you would like to place a bid on any lot but cannot attend the sale, please contact Grant Hubbard, Mark Johnson or any member of the sale staff. Live bidding will also be available for registered bidders via CCI.live. See page 40 for instructions.

Complimentary lunch will be served sale day. Please be our guest!

HOTEL ACCOMMODATIONS

Several hotels are available in Stillwater. Two of the more conveniently located are: LaQuinta Inn & Suites, (405) 564-0599; and Holiday Inn Express, (405) 372-2445.

AIR TRANSPORTATION

Stillwater Municipal Airport has complete services and facilities to accommodate any size aircraft. Major terminals at Oklahoma City and Tulsa are approximately 75 miles from Stillwater and are served by many major airlines.

TERMS OF SALE

CASH. Each animal will be sold to the highest bidder. The auctioneer in charge will settle any dispute as to bids. All cattle are to be paid for by the purchaser during or immediately following the sale and will not be released until after settlement has been made. Cattle will not be transferred until paid for in full.

OSU BURSAR'S OFFICE POLICY AND PROCEDURES

There will be a finance charge computed at a periodic monthly rate of 1.5% per month, or an APR of 19.56%, on any unpaid balance. All accounts with an unpaid balance will be assessed a minimum finance charge of \$.50 per month. Bursar accounts are assessed a finance charge after 30 days past the due date on any remaining unpaid balance that has been billed.

REGISTRATION CERTIFICATES

The animals will be transferred to the buyer at the seller's expense. Each buyer must be sure to give the sale clerk the proper name and address for making transfers. All calves born before the sale have been registered by the seller; proper breeding statements will be signed by the seller for the buyer to use in registering calves born after the sale.

HERD HEALTH

The health of the cattle is excellent. Health papers will be furnished for interstate shipment. OSU is a Brucellosis-Certified and Tuberculosis-Accredited herd. All bulls have received a physical examination consisting of scrotal circumference measurement, rectal palpation and penis and prepuce examination and have been semen tested. We practice an extensive herd health program at OSU. Prior to weaning, calves receive two rounds of Express FP5, Caliber 7, Covexin 8, Presponse HM and Cydectin Pour-On; after weaning, they are de-wormed with Ivomec Injectable. Breeding-age females receive Express FP3 VL5, Lepto 5 and Caliber 7 and are poured with Cydectin. Bulls are also poured with Cydectin as yearlings.

TRUCKING

We work with many reputable trucking companies and will be happy to assist you with making arrangements for the delivery of your purchases. This is all done at the expense of the buyer. We recommend that insurance be obtained on lots purchased.

All persons who attend the sale do so at their own risk. Neither Oklahoma State University nor any person connected with the sale assumes liability, legal or otherwise, for accidents or loss of property. Announcements made sale day from the auction block will supercede all printed material. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time.

EXPECTED PROGENY DIFFERENCES

EPDs are included for the animals offered in this sale. EPDs are expressed as plus (+) or minus (-) units that measure that trait. For example, birth weight, weaning weight and yearling weight are given in pounds. Milk EPDs are expressed as pounds of weaning weight and should be considered only in cases when females will be kept as replacements.

Many of the EPDs reported on the Angus and Hereford lots include results from genomic, or DNA, tests. GE-EPDs offer increased predictability and decreased risk for young, unproven animals due to enhanced accuracy.

The following table is designed to serve as a reference for comparing seedstock of a particular breed. Because most seedstock are selected at a young age, the most useful standard of comparison is often the average of other young animals within the breed. **This table cannot be used to compare EPDs of the different breeds.**

SPRING 2023 BREED AVERAGE EPDS:

	CED	BW	WW	YW	SC	Milk	Marb	RE
Angus Non-Parent Cows	+ 6	+1.2	+60	+107	+.84	+26	+.66	+.64
Angus Current Dams	+ 6	+1.3	+56	+ 98	+.76	+26	+.53	+.51
Angus Non-Parent Bulls	+ 6	+1.2	+61	+108	+.86	+27	+.63	+.62
Hereford 2021/22 Calves	+2.9	+2.8	+54	+ 87	+1.0	+26	+.12	+.41
Purebred Simmental	+12.4	+0.3	+76	+118		+23	+.32	+.67

ULTRASOUND MEASUREMENTS OF BODY COMPOSITION

Ultrasound measurements were taken on the yearling females and all of the bulls. We are including this information in addition to each animal's ultrasound-based body composition EPDs. Data included are for:

Marbling, or Intramuscular Fat (%IMF), is measured as a percent of fat in the ribeye muscle at the 12–13th rib interface. This measurement is adjusted to 365 days of age. Intramuscular fat percentage should only be used for in-herd comparisons, as feeding conditions may vary. Heritability for marbling is moderate. Beef Quality Grades are based largely on USDA Graders' subjective evaluation of the degree of marbling in the ribeye. Selection for increased marbling should improve beef quality grades.

Furthermore, the genetic correlation between marbling and fat thickness is low, meaning breeders can select for increased marbling without also increasing fat thickness. The percent intramuscular fat figures can be converted into quality grades. For example: 3% indicates USDA Select; 4% indicates USDA Low Choice; 7% indicates USDA High Choice, 9% indicates USDA Prime.

In general, steer progeny should have about 2% more intramuscular fat than their sires. Therefore, a yearling bull with 3% intramuscular fat should sire steers with approximately 5% intramuscular fat.

Ribeye Area (RE or REA) is measured in square inches. REA is highly and positively correlated with percent retail yield. The heritability of this trait is moderately high, indicating that selection for improvement of REA should be successful. According to National Beef Quality Audits conducted by NCBA, carcass REAs from 11 to 14 square inches are most desirable. REA is adjusted to 365 days of age. A suggestion to remember if using ultrasound REA measures in selection programs to improve muscling: evaluate the ultrasound REA relative to hundred lbs. of live weight. For example, a bull with a 14.4 square inch REA weighing 1200 lbs. (14.4 divided by 12) would have a REA/live cwt. ratio of 1.2. While a ratio of 1.0 is considered an acceptable degree of muscling, breeders selecting for improved muscling should select bulls with at least a 1.1 or above REA/live cwt ratio. A higher REA EPD would indicate more muscling.

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

American Angus Association \$Value Indexes

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Combined Value (\$C), an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

OSU Terms and Conditions of Sale

UNLESS OTHERWISE EXPRESSLY STATED IN THESE SALE TERMS AND CONDITIONS OR ANY OTHER WRITTEN AGREEMENT BETWEEN THE PARTIES RELATING TO THE SALE OF CATTLE UNDER THESE SALE TERMS AND CONDITIONS, OKLAHOMA STATE UNIVERSITY (OSU) MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, EVEN IF SUCH PURPOSE IS KNOWN TO THE PARTIES.

THE REMEDIES PROVIDED IN THESE SALE TERMS AND CONDITIONS ARE THE EXCLUSIVE REMEDIES OF THE BUYER, OR ANY PARTY CLAIMING THROUGH THE BUYER, AND UNDER NO CIRCUMSTANCES WILL OSU BE LIABLE FOR ANY INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES UNDER ANY INDEMNITY PROVISION OR OTHERWISE.

TERMS OF SALE

Bidding: Each animal will be sold to the highest bidder. The auctioneer in charge will settle any disputes as to bids, and his decision on such matters will be final.

Announcements: If there is any inconsistency in the terms of this sale book, the supplement sheet or day-of-sale announcement, (i) the day-of-sale announcement will control over both the supplement sheet and the sale book, and (ii) the supplement sheet will control over the sale book.

Cash Sale: All sales are for cash unless satisfactory credit arrangements, including any possible reservation of security interest by the vendor, have been made with the vendor prior to sale.

OSU Bursar's Office Policy and Procedures: There will be a finance charge computed at a periodic monthly rate of 1.5% per month, or an APR of 19.56%, on any unpaid balance. All accounts with an unpaid balance will be assessed a minimum finance charge of \$.50 per month. Bursar accounts are assessed a finance charge after 30 days past the due date on any remaining unpaid balance that has been billed.

Buyer's risk: The risk of loss and injury of each animal passes to the buyer as soon as it is sold, but it is the obligation of OSU to ensure that animals are fed and cared for free of charge to the buyer until loaded for shipment or until the expiration of 48 hours after the sale, whichever occurs sooner.

Identification:

- OSU must ensure that each animal has a readable permanent identification mark (e.g., tattoo, hot-iron brand or freeze brand) corresponding to its registration.
- The buyer must check all permanent identification marks for accuracy.
- In those cases where a nickname is used by OSU, the nickname must also be accompanied by the official registered name and number of the animal.

Certificate of Registration: A transferred certificate of registration must be furnished by OSU free of charge to the buyer for each animal within 45 days following the later of the date of sale and receipt of full payment.

Artificial Insemination (AI) service certificates: Upon the buyer's request, AI Service Certificates must be furnished by OSU free of charge to the buyer for all females bred artificially to bulls not owned by OSU.

GUARANTEES

Health: Unless otherwise announced, OSU guarantees that all animals are eligible for interstate shipment as required by federal regulations.

Conformance with registration:

- OSU guarantees that unless noted otherwise, all animals are registered under the rules of their respective breed association.
- OSU guarantees to the buyer that all animals conform to the registration certificate as entered in the Herd Book of either the American Angus Association, American Hereford Association, American Simmental Association or International Brangus Breeders Association.

Pedigree:

- OSU guarantees to the buyer that the pedigree, performance data and individual genetic defect designation of the animal, as represented in any sales materials (including any sale book, supplement sheet or day-of-sale announcement), is accurate.
- The absence of any such designation on the pedigree of an animal, in a sale book, does not establish that the animal in question is not a carrier of any such genetic defect or genetic factor.
- In those cases where a commonly understood nickname is used by OSU, OSU guarantees the pedigree of the animal based on the commonly understood nickname.

Sex: Unless otherwise represented by OSU, there are no guarantees that offspring will be of a particular sex.

Breeding guarantees:

- OSU guarantees that all bulls are breeders, but only if such bulls are at least 12 months old at the time of sale and have not been allowed to run with the herd until at least 14 months of age. A bull that settles a cow by natural service and passes a fertility test made by competent veterinarians mutually agreed upon by the buyer and OSU, during any six-month period of trial (provided for in paragraph 2 of the section entitled "Options and privileges of return or adjustment") will be considered a breeder. Unless otherwise agreed by the buyer and OSU, OSU makes no guarantees with respect to the ability to freeze semen.
- OSU guarantees that all animals are breeders, with the exception of: (a) calves under 12 months of age at the time of the sale; (b) animals shown after the sale has occurred (in such cases, the breeding guarantees, if any, will be those guarantees as are agreed upon between OSU and the buyer); (c) injury or disease occurring after the sale; and (d) gross negligence or willful misconduct on the part of the buyer.
- "Safe-in-calf" females are guaranteed by OSU to have been examined by a competent veterinarian and determined to be in calf.
- "Served" females are not guaranteed to be in calf.
- "Pasture bred" females have been exposed but are not guaranteed to be in calf.
- "Open" females have not been served and are guaranteed by OSU to be without calf.
- Donor females:
 - Unless otherwise agreed by the buyer and OSU, a female that has been used in an embryo transfer program is not guaranteed to be a breeder after the date of the sale.

b. Unless otherwise agreed by the buyer and OSU, a female is not guaranteed to be a breeder after the date of the sale, when that female is to be used, or attempted to be used, in an embryo transfer program.

8. OSU makes the following guarantees with respect to all "pregnant recipients": (i) that the female is pregnant, (ii) that the resulting calf is of the pedigree represented, and (iii) that the resulting calf is of the sex represented (if so represented).

Semen: Unless otherwise agreed by the buyer and OSU, with respect to the sale of semen OSU makes no guarantees with respect to the performance or characteristics of such semen and the buyer is purchasing such semen "as is."

Embryos: Unless otherwise agreed by the buyer and OSU, with respect to the sale of embryos OSU makes no guarantees with respect to the performance or characteristics of such embryos and the buyer is purchasing such embryos "as is."

Options and privileges of return or adjustment:

- Except as provided in paragraph 2 of this section, all claims for adjustment or refund must be made in writing on or before the later of (i) six months after the sale date and (ii) the date on which the animal reaches 30 months of age.
 - All claims relating to the misrepresentation of service sire and all claims relating to paragraphs 10 and 11 of this section must be made in writing on or before the second anniversary of the date of sale.
 - If an animal is claimed to be a non-breeder, the animal may be returned to OSU if in good condition and complying with the health requirements of Oklahoma. OSU is entitled to six months trial following the return of the animal in which to prove that the animal is a breeder. If at the end of the six-month period OSU is unable to prove the animal is a breeder, OSU must, at the option of the buyer, replace the animal with another of equal value or refund the purchase price. The return of the full purchase price will be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder will be the responsibility of the buyer, except that OSU will be responsible for transportation costs in excess of the distance between the buyer's farm and the location where the sale took place. If OSU proves the animal to be a breeder, it will be the obligation of the buyer to take delivery of the animal and pay all transportation expenses.
 - If a female sold as "safe in calf" proves not to be in calf, the buyer may receive service from the bull previously used, if available. If the bull is not available, OSU must make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon return of the animal to OSU. Any adjustment provided for in this paragraph will absolve OSU from further liability, except in if such female proves to be a non-breeder. If a female represented as "safe in calf" to a certain bull at the time of sale proves to have been bred to a different bull, OSU must make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon return of the animal to OSU (adjustments will not be considered to be a breeding fee or an allocation of the purchase price to any unborn calf).
 - If a female sold as "open" proves to be with calf, the buyer may return the animal to OSU prior to calving for a refund of the full purchase price or for another animal of equal value, whichever is acceptable to the buyer. OSU is responsible for all transportation expenses.
 - Cows with calves at their side are presumed to be breeders with no further fertility guarantee.
 - White skin or hair on Angus cattle must not be painted or altered. If such painting or alteration has occurred, the buyer may return the animal to OSU for a refund of the full purchase price or for another animal of equal value, whichever is acceptable to the buyer.
 - If an animal (including the offspring of a pregnant recipient) is sold and at a later date proves not to have been eligible for registration under the rules of its respective breed association, OSU must make a satisfactory adjustment on the purchase price to the buyer, or at the option of the buyer, refund the purchase price upon the return of the animal to OSU.
 - If (i) an animal is sold (including the offspring of a pregnant recipient) and through DNA-marker-typing is proven to have incorrect parentage, as represented by the certificate of registration, and for which parentage can be determined, or (ii) the resulting calf of a pregnant recipient is not of the sex represented, OSU is obligated to make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon the return of the animal to OSU.
 - Except as provided in paragraphs 4 and 6 of this section, all transportation expenses incurred will be the responsibility of the buyer.
- Retention of genetic material:** Unless otherwise agreed in writing by OSU and the buyer, OSU will not retain any genetic material of any animal for the purpose of cloning. **A 1/3 semen interest is retained in all service-age bulls.**

DISCLOSURE OF TEST RESULTS FOR KNOWN GENETIC DEFECTS AND FACTORS

OSU shall have an affirmative duty to notify the buyer of any test results for genetic defects or genetic factors not otherwise reflected on an animal's pedigree.

Optional Guarantee—Genetic Defects:

- The buyer and seller may determine the scope and duration of a guarantee, if any, on an individual basis. OSU may, but is not required to, provide a guarantee to the buyer relating to genetic defects.
- Nothing contained herein should be construed to relieve the parties from complying fully with all the rules and policies of the respective breed association relating to genetic defects generally or individually.

MISCELLANEOUS

- The above terms and conditions of sale constitute a contract between the buyer of each animal and OSU and are equally binding upon both parties. Each sale or resale of an animal constitutes a separate transaction.
 - Neither Oklahoma State University, the sale coordinator nor any other person connected with the management of the sale assumes any liability, legal or otherwise.
 - These sale terms and conditions and all rights, obligations and duties arising hereunder and all disputes arising hereunder will be construed in accordance with, and governed by, the laws of the State of Oklahoma, without giving effect to such state's choice of law rules.
- For voluntary consideration and use by sellers in their independent business judgment.

An incredible way to start off the 44th Annual Cowboy Classic catalog with Lot 1A, OSU Empress 2110. This female was part of the 2023 Cattlemen's Congress Champion Pen of 3 Angus females in OKC and is a full sister to lead off female OSU Empress 2116, who demanded \$15,000 in the Bases Loaded Sale in January to Pollard Farms. Not only does 2110 impress with her attractive phenotype, when you study her on paper, she has a robust genomic profile. She posted a REA ratio of 112.

The Icons aren't going out of style anytime soon! True cow power lies here in OSU Empress 2111. This Iconic daughter is genuine in her width and body shape. She was also a member of the 2023 Champion Pen of 3 Angus females in January. The dam of Lots 1A and 1B is the foundation Empress in the LaConquista Ranches program in Canada. OSU Empress 9164 was the high selling two-year-old in the 2021 Cowboy Classic, bringing \$10,000. 2111 ranks in the top 1% for WW and top 2% for YW, combined with an IMF ratio of 123 and a REA ratio of 115.

• Breeding information available sale day.

This is the alternate female in the stacked 2023 Champion Pen of 3 heifers. OSU Empress 2101 is a super balanced, very complete female by the deceased and super rare ST Genetics sire Connealy Clarity. She stems back to the powerhouse donor OSU Empress 5102, who was Wall Street Cattle Co.'s \$10,000 selection in the 2020 Cowboy Classic. This female is the low input kind that is certainly built for the long haul.

• Breeding information available sale day.

A true sale highlight right here! This heifer is one of the best females ever produced at the Purebred Beef Center in terms of her combination of phenotype and genotype. This three-dimensional Home Town daughter is the first natural calf out of a \$15,000 donor for Chapman Angus and Oklahoma State. 2166 is moderate in her design while not giving anything up in terms of true cow power and does all of this while ranking in the top 1 percent in \$C, \$B, \$G, and RE. This is a truly unique breeding piece that will excel in the PGS ring or the donor pen!

• Breeding information available sale day. Offered with Chapman Angus.

The Grenade progeny have made their mark here at the PBC as being the cattleman's kind! We like the added growth and performance in this female. Her added dimension and bone set the framework for her to be a bull producer. Even on paper, her genetic markers rank her in the top 2% for WW and top 1% for YW. Check out her full brothers selling as Lots 38, 41, 42 and 44.

• Breeding information available sale day.

ESTABLISHED IN THE 1920s, the OSU Animal Science purebred cow herd has earned nationwide acceptance as a source of genetically superior seedstock while serving primarily as a teaching tool for students at OSU and for 4-H and FFA youth throughout Oklahoma as well as the entire nation. It is our privilege to contribute to the outstanding quality of students and alumni from OSU's Department of Animal Science while developing one of America's most respected cow herds.

Thank you for your powerful support!

Stunner progeny have been making noise across the country for having the added look and being sure footed. There are no exceptions here in these full sisters. These females are full sibs to members of OSU's 2022 Champion Pen of 3 Angus Heifers at Cattlemen's Congress. The granddam of Lots 12 and 13 is OSU Queen 0168, who sold in 2018 for \$15,500 and has generated an abundance of revenue over the past several years.

• Breeding information available sale day.

This is a brood cow in the making. 1132 is a big ribbed female that is moderate in her kind. This featured two-year-old by GAR Home Town, the number 1 progeny registered bull in the Angus breed, is out of a top seller in the 2020 Cowboy Classic online sale who is doing a fantastic job in Canada. 1132 combines this tremendous pedigree with an 80 \$M! A full brother sells as Lot 76.

• Breeding information available sale day.

The PBC prides itself on producing self-efficient females that still possess a look of quality, and this proven donor does exactly that. 8119 has been a successful partnership with Chapman Angus Ranch, producing high quality seedstock, as you can see in Lot 27, OSU Empress 2222. Her iconic daughter shows the power, look, and genotype that this donor can infuse into her offspring.

8119 has been aspirated once for six transferable embryos and produced two transferable embryos in her only conventional flush.

• Breeding information available sale day. Offered with Chapman Angus Ranch.

Super complete and maternal designed young donor! The Colonel daughters have proven themselves in production as being low maintenance cows that out produce themselves every year. This young female has two fall PGS heifer prospects that show the presence and style that this female can inject into her offering. Also look at Lot 74 to see her capability of producing powerful herd bulls. This young female is one that you can build your program around!

9231 produced seven transferable embryos in her only flush.

• Breeding information available sale day.

Look in on this exciting young female that does so much right. She's sired by the deceased ST Genetics sire Connealy Clarity and is anchored by OSU Empress 1105, who has 39 registered progeny. Her pedigree is impressive by itself, but she also ranks in the top 10% for CED, top 15% for YW, and top 15% for \$C while offering a great look of balance and eye appeal. The donor dam of Lots 30A and 30B sells as Lot 25.

• Sells open.

This flush sister to Lot 30A is another intriguing daughter of Clarity. Lot 30B, much like her sister, is a feminine heifer that has a great presence. She ranks in the top 10% for CED and top 20% for BW while still being balanced in her growth curve and ranking in the top 10% for YW. These two sisters have done nothing but get better leading up to the sale. There's a lot of quality in this young female, who is in the top 10% for \$M and \$W.

• Sells open.

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 10-36 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation at www.angus.org.

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k or i50k by partner Zoetis.

The Angus EPDs in this catalog are genomically enhanced or will be by sale day, giving you the maximum reliability available to use in making your selections. Feel free to ask us if you have questions on how to use the information, or go online to angus.org for more information.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Only 1 in 4 non-parent Angus bulls qualify.

The Bulls

Lots 31-82

ABOUT THE “COWBOY CLASSIC” BULLS

We are proud to offer this set of fall 2021 and early spring 2022 yearling bulls. They are cataloged by relationship and age for your convenience. The sale bulls were hand fed since weaning. They have been on a diet of free-choice hay and 12 to 15 pounds per day of concentrated bull ration. Please refer to the “Taking Care of Your Bull” section below for our recommendations.

Again this year we are offering a **volume discount** for bull buyers that works proportionately to the number of bulls purchased, as follows:

- Buy 2 bulls—receive 2% discount
- Buy 3 bulls—receive 3% discount
- Buy 4 bulls—receive 4% discount
- Buy 5 bulls—receive 5% discount
- Buy 6 bulls—receive 6% discount
- Buy 7 or more bulls—discount is 10%

We stand behind these bulls 100 percent. They are guaranteed breeders and fertile to the best of our knowledge. If bulls become functionally infertile within the next twelve months, we will provide a satisfactory replacement, if available, or we will issue a credit equal to the purchase price minus salvage value in any of our future sales. We ask that you contact us before you cull an infertile bull. Remember...this is not a life insurance policy whereby we will replace bulls for any reason but our attempt to make sure that you are satisfied with your purchase.

Taking Care of Your Bull

Remember, these bulls are only 12 to 19 months of age and are still growing. Protect your investment by feeding your bull well. You should feed 5 to 10 lbs. of grain, 1 to 2 lbs. of protein supplement and free-choice hay to allow your bull/s to adequately develop. Supplemental feeding during breeding season is recommended if possible. After breeding season, continue to feed liberally so the bull will grow out well. All bulls selling have been getting plenty of exercise and have passed a breeding soundness examination; however, there is a natural limit to what can be expected of them. Observe the following guidelines in determining how heavily to use your bull based on his age at the start of breeding season.

<u>Bull's Age</u>	<u>No. of Females</u>
12 – 15 mos.	10 – 12
15 – 18 mos.	12 – 18
18 – 24 mos.	18 – 25
24 mos. and older	25 – 35

NOTE:

OSU will retain 1/3 revenue sharing and 1/3 semen interest in Lots 31-82.

Read below for details.

SELLING 2/3 INTEREST IN & FULL POSSESSION OF ALL SERVICE-AGE BULLS

We are reserving 1/3 revenue sharing and 1/3 semen interest in all service-age bulls in the sale. This means the bull is totally in your control in how you want to handle him, and you get 100% of the salvage value of the bull. We are simply reserving the right to a share of semen sales revenue from the bull if, at some point in the future, semen sales become a reality. If you sell the bull to another breeder, Oklahoma State University Purebred Beef Center retains the semen interest.

While it is unlikely that large amounts of semen will be sold from many of the bulls, bulls are often “discovered” later in life, after proving themselves in the breeding pasture. It is for this reason that we are keeping a semen interest in all bulls sold in the Cowboy Classic.

Even bulls sold to commercial herds may become popular at a later time, as more carcass data is collected on their calves. If you purchase a bull that we retain an interest in and you choose to collect semen from that bull as an “insurance policy” for your own use, that semen is 100% yours. Oklahoma State University Purebred Beef Center may also wish to collect semen from the bull, either for in-herd use or to build a jointly owned semen bank for sale purposes.

If you are not interested in collecting semen on the bull, OSU has the right to collect the bull, at their own expense, for their use. Semen collection will be arranged at the convenience of the owner of the possession interest.

Ranks in the top 1% for WW and top 2% for YW and \$W. Full brothers sell as Lots 38, 42 and 44. Full sister sells as Lot 6.

YOU'VE EARNED IT

You've made a significant investment in your genetics, but does the market recognize that? The AngusLinkSM Genetic Merit Scorecard was created to objectively describe the genetic merit of your feeder calves. The scorecard gives buyers the confidence they need to pay more for your quality calves.

In 2022, users of the Genetic Merit Scorecard earned a **\$12.94/CWT PREMIUM** on average. Give us a call and we can help you earn what you deserve.

How to Bid Online

STEP 1 - CREATE AN ACCOUNT and REQUESTING BIDDING CREDENTIALS

You can always view an auction without signing in. You must only sign in if you plan to bid on cattle. If you plan to bid on livestock, you must CREATE A NEW ACCOUNT and then request for bidding credentials at **cci.live**. Once you are approved the first time, you do not need to go through the process for each sale. Please DO NOT wait until sale day to request bidding credentials, as some sales require approval more than one day ahead of time. Some sales also require a "bidder passcode" from the sale management for that auction. When you create an account, please use a valid email address. If in the future you forget your bidder's password, you can reset it immediately through the email on your account.

STEP 2 - GET A BUYER NUMBER

Once you are an approved bidder at CCI, you simply go to the SALE SCHEDULE PAGE and click on the auction name that you are interested in, then click BID ONLINE and click GET BUYER NUMBER. You will instantly be assigned a buyer number for that auction. Some sales also require a "bidder passcode" from the sale management for that auction. When you click "get buyer number," you will be instructed to enter the passcode from the sale management for that auction.

STEP 3 - Always refresh your screen if you are going in and out of service and if you "leave" your computer or the app for more than 15 minutes. The computer may log you out if you have not been active for a period of time. It's always a good idea to refresh your screen right before the sale starts. Driving while bidding is not recommended!

BIDDING and SCREEN PRICE—VERY IMPORTANT!!!!

Please note that the asking price on the screen is REAL TIME! Screen or asking price takes precedence over audio and voice! This means that if you have a slow internet connection the auctioneer may be a few seconds behind the screen price that is showing. The screen price is the asking bid at the auction and there is no delay, so you can bid with confidence by watching only the screen asking price. **If you have a slow internet connection, we recommend that you turn off the audio and only watch the asking price box.** The audio and video are for entertainment purposes only. You can also phone in to place your bids if you feel that your internet connection is not acceptable.

Always **refresh your screen periodically**, especially if you move in and out of service.

Always **refresh your device** if you have left it for more than 20 minutes or return to the app after leaving it.

IF I FORGET MY PASSWORD

If you forget your password, simply click on FORGOT PASSWORD and CCI will email a reset password link to your email inbox.

The sire of Lot 73 is a full brother to the two-time Denver Supreme Champion Hereford, \$CHB sire and eight-star Trait Leader BR Belle Air 6011.

2321K ranks in the top 10% for WW and M&G and the top 15% for YW, Milk, Marbling, BII and CHB.

HEREFORD ADVANTAGE

REQUIREMENTS

- Source & Age verification
- Genetic merit
- Minimum of 50% Hereford genetics
- Bull battery ranking in top 50% of breed for \$CHB index (bull battery average)
- Bull ownership transferred (all bulls)
- Vaccination program — two rounds of vaccinations pre-weaning (minimum)

An industry-changing program from the American Hereford Association and IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

BENEFITS

- BQA certification
- Genetic improvement tool
- Sire EPD and profit index summary
- Added market exposure
- Free listing at HerefordMarketplace.com
- Enrollment cost - \$3.00/hd. (verification + eID tag)

Calves at side sired by OSU Black Magic 9171 (AAA 19384153) or EXAR Granada 0944B (AAA 19720802).

OSU Animal Science Major Sponsors

Thank You!
MAJOR SPONSORS
of the OSU
Department of Animal Science

Are you looking for strong, healthy calves? To stop scours in newborn calves? Healthier cattle?

Chelated minerals are between 1.8 to 5.8 times more bioavailable (depending on the mineral) & Mannan oligosaccharides will help to reduce bacterial scours in calves.

Call to find out more! Maximize profits, stop scours, increase conception and improve feed efficiency.
